Job Description

Job Title

Program Manager

About Ocean Power Technologies:

Headquartered in New Jersey, Ocean Power Technologies (Nasdaq: OPTT) aspires to transform the world through durable, innovative, and cost-effective ocean energy solutions. Our PB3 PowerBuoy[®] uses ocean waves to provide clean, reliable, and persistent electric power and real-time communications for remote offshore applications in markets such as oil and gas, defense, security, science and research, and offshore connectivity. The Role:

The Program Manager is a highly-skilled, team-oriented individual who will oversee all aspects of our projects from proposal through delivery support to completion. They will manage both internal and customer projects ensuring compliance to cost and schedule targets.

Responsibilities:

- Prepare, schedule, coordinate, and monitor all assigned projects.
- Apply advanced technical knowledge in support of end-to-end solutions meeting customer requirements.
- Monitor engineering deliverables; initiate appropriate corrective actions throughout the project lifecycle.
- Communicate effectively with both internal and external stakeholders.
- Communicate effectively during daily interactions with the customers and users to interpret their needs and requirements.
- Perform overall quality control of the work (budget, schedule, plans, performance) and regularly report on project status to both technical, managerial, and financial leadership.
- Planning, directing, supervising, and controlling the execution of the programs from kickoff through design, build, test, offshore deployment, and support.
- Developing the scope of engineering work, schedules, and budgets for assigned programs.
- Participate in special projects or tasks as required.

- Support the development of customer proposals, including financial and schedule estimates and write-ups.

Qualifications

- BS/BA degree in STEM field.
- 8+ years overall experience.
- Exemplary work experience as a project manager or similar role.
- Experience in both Project Management and Systems Engineering preferred.
- Experience in Offshore/Subsea operations or construction a plus.
- PMP certification a plus.
- Experience with proposals.
- Experience working directly with customers.
- Competency in MS office.
- Willingness to travel (less than 25%)

Location

Houston, TX or Monroe Township, NJ
